

A J2534 cable that supports the needed channel(s) (ISO9141/CAN/ISO15765/J1850) should work with any J2534-compliant software, OEM or third party. That said, there can be issues with OEM software not behaving in J2534 compliant ways due to bugs or design errors. For this reason, we are maintaining a list here of software which is known to work with our cable. If you find other software which works (or has problems) please let us know at [support@tactrix.com](mailto:support@tactrix.com). The NASTF also maintains a [Service Information Matrix](#) which can help you find software for a particular make.

Company	J2534 Program	Status	Notes
Audi	<a href="#">erWin</a> Not Tested		
BMW	Minimal Testing		
Chrysler	Not Tested		
Ford	<a href="http://www.motorcraftservice.com">http://www.motorcraftservice.com</a>	Not Yet	
J1850 support pending			
General Motors	<a href="#">Tis2Web</a> Minimal Testing		CAN vehicles only
Honda	<a href="#">Honda Pass Thru</a>		
Works			
Jaguar	<a href="http://www.jaguartechno.com">http://www.jaguartechno.com</a>	Not Tested
